

Abdul Sabir

Web/Mobile app developer with 3+ years of professional experience in designing and developing user interfaces, integrating backend services, testing and debugging applications using popular frontend frameworks including React, Angular and Ionic.

EXPERIENCE

Freelance — Web and Mobile App Developer

Dec 2019 - Dec 2021

- Developed a mobile application from scratch featuring tiktok like video scrolling, user authentication and form submission using React Native.
- Revamped user interface of a production ready mobile application to give it a complete new and modern feel using Ionic framework.
- Replaced the existing REST API integration of an app with Apollo GraphQL on the frontend for better performance.
- Added offline capability and cache storage to an app using apollo client which helped in reducing load times and network calls, allowing users to use the app without internet and enhancing user experience.
- Implemented user authentication on the frontend using AWS Amplify with Angular.
- Integrated native APIs like Camera, Notifications, Audio, Video and SMS using angular Ionic.
- Worked extensively on testing, debugging and error fixing while working on different applications.

InApp Solutions, Karachi — Frontend Developer

June 2019 - Nov 2019

- Designed and developed a fully responsive user interface of a web app using Flexbox and SCSS with React and Redux.
- Integrated backend API to the frontend to display the data of a warehouse management application using Angular framework.
- Worked on the API development of an app using Node, Express, MongoDB and Mongoose.

AppBakerz, Karachi — Internee

June 2018 - Sept 2018

- Worked on an ecommerce application built with React and Redux under a senior developer.
- Developed the UI and integrated API to the frontend of the app.
- Built the landing page of a local fast food company.
